

PROGRAM SNAPSHOT

NATIONAL ECOVINEYARDS PROGRAM

We invite you to find out more about the National EcoVineyards Program aims, themes, activities and resources

GROWING IN HARMONY WITH NATURE

What is the National EcoVineyards Program?

Winegrape growers throughout Australia are being supported in their actions to enhance soil health, increase use of ground covers and improve functional biodiversity in their vineyards via the National EcoVineyards Program from July 2022 to June 2025.

This national program is funded by Wine Australia and delivered by Retallack Viticulture Pty Ltd with significant support from regional communities.

Aims

The National EcoVineyards Program aims to accelerate adoption and practice change outcomes specified in Wine Australia's Strategic plan 2020 to 2025 specifically:

- to increase the land area dedicated to enhancing functional biodiversity by 10 per cent, and
- to increase the use of vineyard cover crops and soil remediation practices by 10 per cent

Themes

Each year has a different theme and events are held in spring and post vintage each season:

- soil health (2022/23)
- ground covers including cover crops (2023/24)
- functional biodiversity (2024/25)

For information about upcoming events please visit the [events](#) page.

Dr Mary Retallack, Retallack Viticulture Pty Ltd, National EcoVineyards Program Manager

Mary is the Managing Director of Retallack Viticulture Pty Ltd which offers a broad range of agribusiness and agroecological consulting services throughout Australia and overseas.

As an experienced agricultural scientist, agroecologist and third-generation viticulturist, Mary brings a wide range of skills and experience from practical, research, teaching, and consultancy roles and is recognised internationally as a Certified Practising Agriculturist (CPAg).

Mary has a PhD in viticulture and plant protection and associated tertiary qualifications in conservation and park management, natural resource management, adult education, and arbitration.

Mary is a recognised leader in the fields of viticulture and functional biodiversity enhancement and founder of the National EcoVineyards Program.

EcoGrowers

Following the national 'open call' in late 2022, we announced the new intake of EcoGrowers in each participating region in early 2023. They are establishing a diverse range of demonstration sites to provide practical insights to questions in the field around the topics of soil health, ground covers and functional biodiversity. These insights will be shared in a series of case studies in late 2024.

The new cohort of 31 EcoGrowers joins the EcoVineyards alumni of 45 EcoGrowers who have completed the program, bringing the total number of EcoGrowers to 76 since the programs inception in 2019.

You can read more about each national EcoGrower [here](#) and EcoGrower alumni [here](#).

Regions

Participating regions:

- Hunter Valley, New South Wales
- Orange, New South Wales
- Yarra Valley, Victoria
- Mornington Peninsula, Victoria
- Margaret River, Western Australia
- Clare Valley, South Australia
- Adelaide Hills, South Australia
- Langhorne Creek, South Australia

Regional on-ground coordinators (ROCs)

Meet your local ROC who can answer questions you may have about the National EcoVineyards Program in your region. To find out more contact admin@ecovineyards.com.au

Grower resources

Wine growers have access to a new suite of region-specific resources:

- fact sheets
- case studies
- grower insights
- soil health indicators (videos, booklet and posters)
- native plant lists for each participating region
- a range of podcasts and videos
- biodiversity action plan (BAP) and supporting materials
- scientific articles
- the natural predators booklet

All growers benefit through the information-sharing activities associated with the National EcoVineyards Program including various grower events and resources, grower discounts on supplies and field walks associated with each demonstration site.

To find out more please visit the knowledge hub www.ecovineyards.com.au

Deliverables

The following deliverables have been achieved and provide insights to the broad and diverse ways the National EcoVineyards Program has created significant impact in a relatively short period of time.

140+

Partnering businesses
are working in collaboration with the common purpose of fostering environmental stewardship

75

Demonstration sites
have been established across Australia featuring a range of ecological practices and tailored EcoVineyards signage

190

Microbat boxes
have been installed across Australia (in collaboration with Seaford Rotary)

75

Predator perches
and 75 photo points have been designed, manufactured, and installed (in collaboration with Ocvitti Australia/Ocloc)

50+

Workshops
field days and networking events (twice per year over 4 years in 8 major wine regions)

1,250

Attendees
at grower events over the last 4 years.

55,209

Native insectary plants
grasses, forbs, woody ground cover, shrubs and trees have been planted in the last 4 years.

68

EcoGrowers profiles
have been completed

37

Case studies
have been completed

12

Supporting information
12 articles that provide scientific research about native insectary plants and the arthropods found in association.

14

Native plant community lists
a summary for each participating region across Australia

80 page Booklet

'Natural predators of vineyard insect pests' written by Dr Mary Retallack, Retallack Viticulture

22

Fact sheets and videos
comprising 150 pages have been developed showcasing grower insights, biodiversity action plans (BAPs), native insectary plants and predators found in association, fire resistant native insectary plants, sedges on the edges, weedy species and soil health indicators for Australian vineyards (1 booklet, 2 posters and 6 videos)

13

Signage templates
EcoVineyards signage templates x 3 large and x 10 small format for native insectary plants and the arthropods found in association have been produced.
